## Solving and blitz tourneys

Open solving (sponsored by harmôtivie)

- Monday, 7 August 2017, 9:00-13:00, main hall
- 120 solvers are registered. For late registrations contact tourney director Luc Palmans

## World Chess Solving Championsship

- Tuesday \& Wednesday, 8+9 August 2017, 9:00-13:00, main hall
- Participants are nominated by national team captains during the captains meeting.
- Tourney director: Axel Steinbrink

## Annan Chess Blitz Tourney

- Tuesday, 8 August 2017, 15:00-18:00, main hall
- time control: 5' +3 " Fischer increment
- Registration: add your name to the list on the pin board in the lobby or show up 15 ' before the start of the tourney.
- Prizes: Single Malt Scotch Whisky
- Annan Chess: Units move normally except when they are standing one square directly in front of another unit of the same color, when they move with the power of the rear unit. In the starting position, all pawns (black and white) move with the power of the piece behind them, e.g. 1.Pc2:h7 (as bishop).

## Fairy Solving Tourney

- Wednesday, 9 August 2017, 20:30-22:30, main hall
- Registration: add your name to the list on the pin board in the lobby by 9/8/2017, 18:00.

## 15th Ukrainian-Folk-Crafts Tourney

## Theme:

S\#2. O'Rey theme: in the diagram position, White has the same set response to all moves of a black thematic piece; moreover, set responses are available for White to all black moves but one; in the try (tries), White aims at creating a response to that move or to make it unplayable; one particular move by the thematic piece is the only refutation. After the key, there is some or other kind of change of play.

## Illustration/Example(s):

Andrey Frolkin
Original

In the diagram position, any move by the black Se6 is met with a set white move: $* 1 \ldots S e \sim 2 . R 7 d 4+S \times d 4 \#$. If 1.R7d6,R7d5,Sh2?, then $1 \ldots . \mathrm{g} 3$ ! White tries to make this move unplayable: $1 . \mathrm{Rg} 3$ ? $\mathrm{Se} \sim 2 . \operatorname{Rd} 4+\mathrm{S} \times \mathrm{d} 4 \#$, but $1 . . . \mathrm{Sc} 5$ ! $(2 . \mathrm{B} \times \mathrm{c} 5$ b6!) After the key 1.Re7! the set variants are made unplayable; only $1 \ldots \mathrm{~g} 3$ remains, which is followed by a "radical change": 2.R3d4+ Sxd4\#.

Prizes: There will be three prizes, honorable mentions and commendations. The prizes are products of the Artistic Ceramics Opishnia Plant (Poltava province, Ukraine). The winner and the runner-up will also receive a brochure with the awards in all (14) previous Ukrainian Folk Crafts tourneys, including last year's tourney in Belgrade (2016).

## 10th ARVES Jenever-Tourney 2017

## Theme:

Win or draw study with Umnov effect. White plays to a square previously vacated by a black piece (not a pawn). The thematic try should be that White makes the same move as a capture before the black piece vacates the square.

## 17th Japanese-Sake Tourney

## Theme:

h\#2, Partial Paralysis. When a piece X is observed by an opposite piece $\mathrm{Y}, \mathrm{X}$ cannot move or capture like Y. (Note: Particularly, in the case of $Y=X$, this means Madrasi relation.) Castling is possible if and only if each single step of K is legal.
Any other fairy pieces and/or conditions are not allowed.

## Illustration/Example(s):

Dia. i: $0-0-0$ is possible because $\mathrm{Ke} 1-\mathrm{d} 1$ and $\mathrm{Kd1}-\mathrm{c} 1$ are legal, but $0-0$ is not possible because Kf1-g1 is illegal. ## Champagne-Tourney

## Theme:

Generalised (anti) Pronkin: - A square is occupied by an original piece and a promoted piece of same nature and colour. Original game-array squares (Pronkin) and promotion squares (antiPronkin) are excluded for this tourney, i.e. Pronkin and anti-Pronkin are not thematic!
Two sections: A. Proof games, B. any other kind of Retro problems
In B section, in case of positions with few pieces, (such as can be found in Procas...), a piece is considered as original if it cannot be proved promoted.

## Moskovskaya Matreshka-Tourney

## Theme:

h\#2 (orthodox).
A tactical effect X appears as a result of the interaction of two pieces of different colors.
In one line of play the piece A , having a choice, moves so that the effect X occurs in relation to the piece $B$. In another line of play, the same piece A moves to avoid the same effect $X$ in relation to the same piece B.
All types of combinations of lines of play are allowed, except for zero positions.

## Potica-Tourney

## Theme:

h\#2-n, Royal Dynasty. No fairy pieces nor further fairy conditions allowed.
Royal Dynasty: In a dynasty there are many royalties and it is not determined who is the master until the last one remains alive. This rule holds good for a chess dynasty, too.
(1) Each side may have more kings on the chessboard.
(2) Promotion to a king is allowed.
(3) If more than one king of one side is present at the same time no king of that side possesses the royal nature. It means that there is no check or mate. Capturing of king(s) but the last one is allowed. The way of moving is unchanged for all kings.
(4) When one side after capturing remains with only one king his royal nature is returned no matter if he results from promotion or not. Castling is a move of royal nature and is allowed with only one king present (if a rook hasn't moved at all and if a king hasn't moved after he remains the only king of his side).

Solutions can be checked by Popeye/Fancy.

## Dresden transport

The public transport in Dresden is well developed. Services are provided by DVB (Dresdner Verkehrsbetriebe) and by Deutsche Bahn. Dresden airport is connected to the city by a rail link and by bus and tram services.
Comprehensive information in four languages (German, English, Czech and Polish) is available via the homepage of DVB: www.dvb.de. The webside has a trip planner with an interactive map to locate tram and bus stops anywhere in the city. There is also a mobile version m.dvb.de, but this is available in German only. However, the classical web site runs nicely on smartphones too. The following tickets are available for travel within the city of Dresden:

- single trip (valid for one person and for one hour, 2.30 EUR; a set of 4 tickets is 8.20 EUR )
- one-day pass for one person (valid for one day, 6.00 EUR)
- one-day family pass (for up to 2 adults and up to 4 children under the age of 15 , valid for one day, 9.00 EUR)
- one-day group pass (for up to 5 persons, valid one day, 15.00 EUR)

Tickets are available at the receiption of the congress hotel. The receptionists can provide further information for your travel plans. Do not hesitate to ask!

## Please do not forget:

The bus stop at the congress hotel is named
"Kauschaer Straße".
